Spirit of Might

Spirit of Knowledge

Spirit of Fear & Reverence to God

Mission

We establish Black Wall Street districts around the globe in the Spirit of the original Black Wall Street District of Tulsa, Oklahoma. With 22,700+ members in the movement for the next 300 years. Membership shows that we are grateful to our ancestry we never met. And are willing to perform great works for future generations. This movement is not about black folks living today. This is a Movement for future generations...people we will never meet, while paying spiritual homage to those we never met.

The Movement for the Next 300 Years

The primary goal of our group is to outline the key elements in establishing Black Wall Street USA (BWS USA) districts. We show persons how to recognize a potential district and perform the necessary tasks to organize a district. This is essential to the continued growth and revitalization of black businesses. This our District manual will guide district leaders through the planning and implementation of Black Wallstreet Districts.

Black Wall Street districts can be recognized as an urban area that is a thriving center of business, industry, and culture and is one commercial strip that has 50%-70% or more businesses owned by African Americans.

This will enable local organizers and BWS district leaders to focus on what they are doing within their potential district. Leaders consider the people to be involved. District president's make sure the group is balanced and no special interests dominate. Refer to our District Implementation Manual (DIM)

By joining Black Wall Street USA Global, you are spiritually supporting the development of current districts around the globe.

INITIATIVE B. Private Black Economy

Establish our community's own private economy, using our own branded crypto currency, that we own and control. Likewise, each Black Wall Street USA South will have its own crypto currency investment club to facilitate this endeavor. In addition, by mining (creating) our own crypto currency on a using open source software and a decentralized network of crypto

currency miners (computers) we will empower our community to own, control, and dominate our own economic system and monetary reserve. Thereby, empowering every Black Man, Woman, and Family to become their own private crypto banker, own their own private crypto bank, which they totally control, that cannot be taxed, cannot be seized, cannot be frozen, that is not subject to the fiat currency system, and that remains anonymous. In essence, our communities' collective private crypto banks will constitute our own private World Black Bank.
